An inductive Koine Greek reader — paradigms unfold as the story does

Κεφάλαιον Α' — Ὁ Γεωργός

Μέρος Α' — Τί ἐστιν;

Grammar Notes

1. The verb ἐστιν (“is”) and predicate nominative

The most common pattern in this part is *X ἐστιν Y* — “X is Y.” The verb ἐστιν (3rd singular present of εἰμί) links the subject to a noun or adjective in the same case (the nominative).

Examples:

- ὁ ἄνθρωπος ἐστιν γεωργός — “the man is a farmer.”
- μέγας ἐστὶν ὁ οὐρανός — “the sky is great.”

2. The article ὁ (“the”) — masculine

Every noun in this part is masculine, taking ὁ in the nominative singular and τὸν in the accusative singular. The noun itself ends in -ος (nominative) and -ον (accusative).

Examples:

- ὁ γεωργός, ὁ οἶκος, ὁ ἄγρός — nominative subjects.
- βλέπει τὸν οἶκον; λαμβάνει τὸν ἄρτον — accusative direct objects.

Paradigm — masculine 2nd declension (introduced so far)

Case	Singular	Function
Nominative	ὁ γεωργ-ός	subject — “the farmer”
Accusative	τὸν γεωργ-όν	direct object — “the farmer”

3. Adjective agreement

Adjectives match their noun in gender, number, and case. As *predicates* (linked by “is”) they have no article; as *attributives* (modifying directly) they sit inside the article-noun frame.

Examples:

- μικρός ἐστὶν ὁ οἶκος — predicate: “the house is small.”
- λαμβάνει τὸν καλὸν ἄρτον — attributive: “he takes the good bread.”

4. Present active indicative — 3rd singular

Most verbs end in -ει for “he/she/it [does it].” Contracted verbs in -έω contract ε + εἰ > εἰ (e.g. φιλέ-ει > φιλεῖ).

Examples:

- ὁ ἥλιος λάμπει — “the sun shines.”
- ὁ γεωργὸς φιλεῖ τὸν οἶκον — “the farmer loves the house.”

5. Present active indicative — 1st singular

In the farmer's monologue verbs shift to the 1st person, ending in -ω. For "to be" we use εἰμί. The pronoun ἐγώ ("I") is added only for emphasis.

Examples:

- ἔχω τὸν οἶκον — "I have the house."
- ἐγὼ δὲ ἔχω τὸν ἀγρόν — "but I have the field" (emphatic).

Paradigm — present active (introduced so far)

Person	Regular (-ω)	Contract (-έω)
1 sg.	βλέπ-ω ("I see")	φιλέ-ω > φιλ-ῶ ("I love")
3 sg.	βλέπ-ει ("he sees")	φιλέ-ει > φιλ-εῖ ("he loves")

εἰμί (irregular) — introduced so far

Person	Form	Meaning
1 sg.	εἰμί	"I am"
3 sg.	ἐστί(ν)	"he/she/it is"

6. Particles & connectives: μέν ... δέ, οὖν, γάρ, καί

These shape the rhythm of Greek prose:

μέν ... δέ sets up contrast ("on the one hand ... on the other"),

οὖν = "therefore,"

γάρ = "for, because" (always 2nd in its clause),

καί = "and / also."

Examples:

- γεωργὸς μὲν εἰμι. ... ἐγὼ δὲ ἔχω τὸν οἶκον — μέν ... δέ contrast.
- ἰσχυρὸς γάρ ἐστιν ἄνθρωπος — "for he is a strong man."

7. The irregular adjective μέγας ("great")

μέγας uses two stems: μεγα- in the masculine nominative singular, and μεγαλ- elsewhere (with -ν added for the accusative).

Examples:

- μέγας ἐστὶν ὁ οὐρανός — nominative.
- αἶρει τὸν μέγαν λίθον — accusative.

Μέρος Β' — Τί Ποιῶ;

Grammar Notes

1. The dative case — “in / at” (location)

New here is the dative singular of masculine 2nd-declension nouns: ending -ῳ with article τῷ. With the preposition ἐν (“in”) it expresses location. Without a preposition the dative also marks the indirect object (“to / for”).

Examples:

- καθίζει ἐν τῷ οἴκῳ — location: “he sits in the house.”
- εὐχαριστῶ τῷ θεῷ — indirect object: “I give thanks to God.”

2. The genitive case — “out of / from” (source)

The genitive singular ends in -ου with article τοῦ. With ἐκ (“out of”) it expresses motion away from a source.

Examples:

- ἐκβαίνει ἐκ τοῦ οἴκου — “he goes out of the house.”
- φέρει τὸν λίθον ἐκ τοῦ ἀγροῦ — “he carries the stone out of the field.”

Paradigm — masculine 2nd declension, singular (now complete)

Case	Form	Function
Nominative	ὁ γεωργ-ός	subject
Accusative	τὸν γεωργ-όν	direct object; with πρὸς = motion toward
Genitive	τοῦ γεωργ-οῦ	of ... ; with ἐκ = motion out of
Dative	τῷ γεωργ-ῷ	to/for ... ; with ἐν = location in

3. The preposition πρὸς + accusative — motion toward

πρὸς with the accusative expresses motion *toward* a place or person.

Examples:

- περιπατεῖ πρὸς τὸν ἀγρόν — “he walks toward the field.”
- περιπατεῖ πρὸς τὸν οἶκον — “he walks toward the house.”

4. Subordinate clauses: ὅτε (“when”) and ὅτι (“because, that”)

ὅτε introduces a temporal clause;

ὅτι introduces a causal or content clause.

Examples:

- ὅτε ὁ γεωργὸς σκάπτει ἐν τῷ ἀγρῷ — temporal: “when the farmer is digging in the field.”
- ὁ βίος καλὸς ἐστὶν ὅτι ὁ θεὸς ἀγαθός — causal: “life is good because God is good.”

5. New verbs of motion and rest

All follow the regular -ει (3 sg.) ending. περιπατέω, ποιέω, εὐχαριστέω are -έω contracts.

Examples:

- καθίζει καὶ μένει ἐν τῷ οἴκῳ — “he sits and stays in the house.”
- ὁ θεὸς ποιεῖ τὸν χόρτον — “God makes the grass.”

6. Adverbs

Adverbs typically end in -ως when formed from adjectives. Time adverbs and connectors stand alone.

Examples:

- ἀληθῶς ἀγαθὸς ἐστὶν ὁ θεός — “truly God is good.”
- σήμερον ἐν τῷ ἀγρῷ σκάπτει — “today he digs in the field.”

7. The negative conjunction οὐδέ (“nor, and not”)

οὐδέ continues a negative clause: “neither / nor / and not.” It joins another negated element to a previous one.

Examples:

- οὐ σκάπτει τὸν ἀγρόν, οὐδὲ φέρει τὸν λίθον — “he is not digging the field, nor carrying the stone.”
- οὐ γὰρ σκάπτει οὐδὲ φέρει λίθους — “for he is neither digging nor carrying stones.”

Κεφάλαιον Β' — Ὁ Κήπος καὶ Τὰ Ζῷα

Μέρος Α' — Ὁ Κήπος

Grammar Notes

1. The neuter 2nd declension

Neuter nouns of the 2nd declension are easy: nominative and accusative are *identical* (both end in -ον with article τό). Genitive and dative use the same endings as the masculine (-ον / -ω).

Examples:

- τὸ δένδρον ἔχει τοὺς κλάδους — nominative: “the tree has the branches.”
- λαμβάνει τὸ δρέπανον — accusative: “he takes the sickle.”

Paradigm — neuter 2nd declension, singular

Case	Form	Function
Nominative	τὸ δένδρ-ον	subject
Accusative	τὸ δένδρ-ον	direct object (same as nom.!)
Genitive	τοῦ δένδρ-ου	“of the tree”
Dative	τῷ δένδρ-ω	“in/on the tree”

2. Neuter plural subject + singular verb

A characteristic Greek rule: a *neuter plural subject* often takes a *singular verb*. The text shows this — alongside the regular plural agreement of masculine subjects.

Examples:

- τὰ ζῷά ἐστιν ἐν τῷ ἀγρῷ — neuter pl. + sg. verb: “the animals are in the field.”
- οἱ κλάδοι φέρουσιν τοὺς καρπούς — masc. pl. + pl. verb: “the branches bear the fruits.”

3. The plural of the masculine 2nd declension

Nominative plural ends in -οι (article οἱ); accusative plural ends in -ους (article τοὺς).

Examples:

- καλοὶ εἰσιν οἱ καρποί — “the fruits are good.”
- θερίζει τοὺς καρπούς — “he harvests the fruits.”

Paradigm — masculine 2nd declension (nom. & acc., now with plural)

Case	Singular	Plural	Function
Nom.	ὁ καρπ-ός	οἱ καρπ-οί	subject
Acc.	τὸν καρπ-όν	τοὺς καρπ-οὺς	direct object

4. Present active indicative — 3rd plural

The 3rd plural ending is -ουσι(ν). The verb “to be” has εἰσί(ν) (“they are”).

Examples:

- οἱ κλάδοι φέρουσιν τοὺς καρπούς — “the branches bear the fruits.”
- καρποὶ καὶ κλάδοι εἰσιν ἐπὶ τῷ δένδρῳ — “fruits and branches are on the tree.”

Paradigm — present active (with plural added)

Person	Regular (-ω)	Contract (-έω)
1 sg.	βλέπ-ω	φιλ-ῶ
3 sg.	βλέπ-ει	φιλ-εῖ
3 pl.	βλέπ-ουσι(ν)	φιλ-οῦσι(ν)

εἰμί (with plural added)

Person	Form	Meaning
1 sg.	εἰμί	“I am”
3 sg.	ἐστί(ν)	“he/she/it is”
3 pl.	εἰσί(ν)	“they are”

5. The preposition ἐπί + dative — “on, upon”

ἐπί + dative expresses resting upon something.

Examples:

- καρποὶ εἰσιν ἐπὶ τῷ δένδρῳ — “fruits are on the tree.”
- ἐπὶ τῷ δένδρῳ καρποὶ καὶ κλάδοι εἰσιν — “on the tree are fruits and branches.”

6. The genitive of possession

Without a preposition, the genitive expresses possession or close belonging — “of the X.”

Examples:

- οἱ καρποὶ τοῦ δένδρου — “the fruits of the tree.”
- ὁ ὄνος ἐστὶν ἐν τῷ ἀγρῷ τοῦ γεωργοῦ — “the donkey is in the farmer’s field.”

7. The preposition πέραν + genitive — “across, beyond”

πέραν takes the genitive and means “across / on the other side of.”

Examples:

- *πέραν τοῦ ποταμοῦ θηρίον ἐστίν* — “across the river there is a beast.”
- *βλέπει τὸν λύκον πέραν τοῦ ποταμοῦ* — “he sees the wolf across the river.”

8. The 3rd-declension noun βοῦς

βοῦς (“ox”) is a 3rd-declension noun (a new pattern, treated fully later). For now: nom. ὁ βοῦς, acc. τὸν βοῦν.

Examples:

- *μέγας ἐστὶν ὁ βοῦς* — nominative.
- *ὁ λύκος οὐ βλέπει τὸν βοῦν* — accusative.

Vocabulary

Nouns — masculine 2nd declension

Lexical Form	Translit.	Meaning
κῆπος, -ου, ὁ	kēpos	garden
κλάδος, -ου, ὁ	klados	branch
ὄνος, -ου, ὁ	onos	donkey

ἐπί (+ dat.)	epi	on, upon
ἐγγύς (+ gen.)	engys	near
πέραν (+ gen.)	peran	across, beyond
ταχέως	tacheōs	quickly

Μέρος Β' — Ὁ Λύκος

Grammar Notes

1. The feminine 1st declension

Feminine 1st-declension nouns end in -α or -η in the nominative. Article ἡ (nom.), τήν (acc.), τῆς (gen.), τῇ (dat.). Note: ῥάβδος is feminine but follows the 2nd-declension pattern (a feminine 2nd-decl. noun).

Examples:

- καλή ἐστὶν ἡ ἡμέρα — nominative: “the day is beautiful.”
- λαμβάνει τὴν ῥάβδον αὐτοῦ — accusative: “he takes his rod.”

Paradigm — feminine 1st declension, singular

Case	in -η	in -α
Nom.	ἡ φων-ή	ἡ ἡμέρ-α
Acc.	τὴν φων-ήν	τὴν ἡμέρ-αν
Gen.	τῆς φων-ῆς	τῆς ἡμέρ-ας
Dat.	τῇ φων-ῇ	τῇ ἡμέρ-ᾳ

2. The dative of means / instrument

Without a preposition, the dative can express the *means* by which something is done.

Examples:

- κρᾶζει φωνῇ μεγάλῃ — “he cries with a great voice.”
- βάλλει τοῖς λίθοις ἐπὶ τὸν λύκον — the stones are the means: “he pelts the wolf with the stones.”

3. The pronoun αὐτός, αὐτή, αὐτό (“he, she, it”)

Forms of αὐτός function as 3rd-person pronouns. The genitive (αὐτοῦ, αὐτῆς) expresses possession (“his, her”). The accusative (αὐτόν, αὐτήν, αὐτό) is the direct object.

Examples:

- οὐ καταλείπει τὰ ζῷα αὐτοῦ — “he does not abandon his animals.”
- θέλει ἀρπάξειν αὐτό — “he wants to seize it.”

Paradigm — αὐτός, -ή, -ό (introduced so far)

Case	Masc.	Fem. / Neut.
Nom.	αὐτ-ός	αὐτ-ή / αὐτ-ό
Acc.	αὐτ-όν	αὐτ-ήν / αὐτ-ό
Gen.	αὐτ-οῦ	αὐτ-ῆς / αὐτ-οῦ

4. The complementary infinitive

Verbs of wanting (θέλω), being about to (μέλλω), and similar verbs take an infinitive complement. The present active infinitive ends in -ειν.

Examples:

- *θέλει ἀρπάζειν τὸ ἀρνίον* — “he wants to seize the lamb.”
- *μέλλει σφάζειν τὸ πρόβατον* — “he is about to save the sheep.”

5. New prepositions: εἰς, ἀπό, ὑπό

εἰς + accusative = “into.”

ἀπό + genitive = “away from.”

ὑπό + dative = “under.”

Examples:

- *τρέχει εἰς τὸν ποταμόν* — “he runs into the river.”
- *σφάζει αὐτὸ ἀπὸ τοῦ λύκου; καθίζει ὑπὸ τῷ δένδρῳ* — “he saves it from the wolf”; “he sits under the tree.”

6. The imperative — 2nd singular

The 2nd-singular present active imperative ends in -ε for regular verbs. It gives a direct command.

Examples:

- *ἔπαγε ἀπὸ τοῦ ἀγροῦ* — “go away from the field!”
- *φέρε τοὺς καρπούς* — “bring the fruits!”

7. The interjection ἰδοὺ (“behold!”)

ἰδοὺ is a frozen imperative used as an exclamation. It draws attention to a sudden or surprising event.

Examples:

- *καὶ ἰδοὺ ὁ λύκος τρέχει εἰς τὸν ποταμόν* — “and behold, the wolf runs into the river!”
- *ἀλλ’ ἰδοὺ, λύκοι εἰσιν πέραν τοῦ ποταμοῦ* — “but behold, there are wolves across the river!”

8. The vocative case (direct address)

Used to address someone directly. Often introduced by the particle ὦ. Masculine 2nd-declension vocative singular ends in -ε.

Examples:

- ὦ κύριε ὁ θεός μου — “O Lord my God!”
- ὦ γεωργέ — “O farmer!” (the regular vocative pattern).

Κεφάλαιον Γ' — Ἡ Ὀψία

Μέρος Α' — Ἡ Ὀψία

Grammar Notes

1. New feminine nouns (1st & 2nd declension)

Several feminine nouns appear here. ἡ σελήνη, ἡ θύρα, ἡ τράπεζα, ἡ καθέδρα, ἡ κλίνη, ἡ σκοτία follow the 1st declension. ἡ ὁδός is feminine but follows the 2nd-declension pattern (like ῥάβδος).

Examples:

- ἡ σελήνη ἀνατέλλει ἐν τῷ οὐρανῷ — 1st-decl. nominative.
- ἀνοίγει τὴν θύραν — 1st-decl. accusative.

2. The preposition ἐπί + genitive — “on (a surface)”

ἐπί is one preposition with three meanings depending on case.

With the *genitive* it means location *on a surface*;

with the *dative* it means resting upon (already seen);

with the *accusative* it means motion onto.

Examples:

- εὕρισκει τὸν λόχνον ἐπὶ τῆς τραπέζης — gen.: “he finds the lamp on the table.”
- καθίζει ἐπὶ τὴν καθέδραν — acc.: “he sits down onto the chair.”

Summary — ἐπί with three cases

Case	Example	Meaning
+ Gen.	ἐπὶ τῆς τραπέζης	on (a surface)
+ Dat.	ἐπὶ τῷ δένδρῳ	upon, on (resting)
+ Acc.	ἐπὶ τὴν καθέδραν	onto (motion)

3. Adjective agreement with feminine nouns

When the noun is feminine, the adjective takes its feminine ending: -η / -α (nom.), -ην / -αν (acc.).

Examples:

- καλὴ ἡ ὀψία — “the evening is beautiful.”
- ἔχει τὴν καλὴν κλίνην — “he has the beautiful bed.”

4. The accusative of duration of time

An accusative without a preposition can express *how long* an action lasts.

Examples:

- *πολὸν χρόνον σκάπτει τὸν ἀγρόν* — “he digs the field for a long time.”
- *τρέχει ὅλην τὴν ἡμέραν* — “it runs the whole day.”

5. More adverbs

Adjectives often form adverbs by replacing -ος with -ως (e.g. καλός > καλῶς). Other useful adverbs: ἔτι, οὐκέτι, σφόδρα.

Examples:

- *ὁ ποταμὸς ῥεῖ καλῶς* — “the river flows well.”
- *ὁ λύχνος ἔτι λάμπει; οὐκέτι σκοτία ἐστίν* — “the lamp still shines”; “it is no longer dark.”

6. Infinitive review — chains of infinitives

A single verb of wanting can govern several infinitives joined by καί.

Examples:

- *θέλει ἐσθίειν καὶ πίνειν καὶ ἡσυχάζειν* — “he wants to eat and drink and rest.”
- *οὐ θέλει ἔτι καθίζειν καὶ μένειν* — “he no longer wants to sit and stay.”

Vocabulary

Nouns — feminine 1st declension

Dat. sg.	λύκ-ῳ	ζῷ-ῳ	ἡμέρ-ᾳ / φων-ῇ
Nom. pl.	λύκ-οι	ζῷ-α	ἡμέρ-αι
Acc. pl.	λύκ-ους	ζῷ-α	ἡμέρ-ας
Gen. pl.	λύκ-ων	ζῷ-ων	ἡμερ-ῶν
Dat. pl.	λύκ-οις	ζῷ-οις	ἡμέρ-αις

2. Numerals: εἷς, μία, ἓν (“one”) and ordinals

“One” has three genders. Ordinals (πρῶτος, δεῦτερος, τρίτος) are regular -ος, -η, -ον adjectives.

Examples:

- οὐχ εἷς λίθος ἀλλὰ λίθοι πολλοί — “not one stone but many stones.”
- ἀνοίγει τὴν πρώτην θύραν, ... τὴν δευτέραν θύραν, ... τὴν τρίτην θύραν — “he opens the first door, ... the second door, ... the third door.”

Paradigm — εἷς, μία, ἓν

Case	Masc.	Fem. / Neut.
Nom.	εἷς	μία / ἓν
Acc.	ἓνα	μίαν / ἓν
Gen.	ένός	μῆς / ενός
Dat.	ένί	μῇ / ἐνί

3. The irregular adjective πολὺς (“much, many”)

Like μέγας, πολὺς uses two stems: πολυ- in the masc./neut. nom. sg., and πολλ- elsewhere.

Examples:

- λίθοι πολλοί εἰσιν ἐν τῷ ἀγρῷ — masc. nom. pl.: “there are many stones in the field.”
- πολλὰ θύραι εἰσιν — fem. nom. pl.: “there are many doors.”

4. Present active indicative — 1st plural

The 1st-plural ending is -ομεν. The pronoun ἡμεῖς (“we”) is used for emphasis.

Examples:

- ἡμεῖς θέλομεν ἐσθίειν — “we want to eat.”
- οὐκ ἔχομεν καρποὺς οὐδὲ ἄρτους — “we have neither fruits nor bread.”

5. Present active indicative — 2nd singular

The 2nd-singular ending is -εις. For “to be,” the form is εἶ. The pronoun σύ (“you”) is emphatic; the object pronoun is σε / σοι / σου.

Examples:

- δίκαιος εἶ καὶ πιστός — “you are righteous and faithful.”
- σὺ σώζεις αὐτὸ ἀπὸ τοῦ λύκου — “you save it from the wolf.”

Paradigm — present active indicative (full)

Person	Regular (-ω)	Contract (-έω)
1 sg.	λύ-ω	φιλ-ῶ
2 sg.	λύ-εις	φιλ-εῖς
3 sg.	λύ-ει	φιλ-εῖ
1 pl.	λύ-ομεν	φιλ-οὔμεν
2 pl.	λύ-ετε	φιλ-εῖτε
3 pl.	λύ-ουσι(ν)	φιλ-οὔσι(ν)

(Forms not yet attested in the readings — 2 pl. forms — are filled in for completeness; you will meet them as the story continues.)

εἰμί — full paradigm

Person	Form	Meaning
1 sg.	εἰμί	“I am”
2 sg.	εἶ	“you are”
3 sg.	ἐστί(ν)	“he/she/it is”
1 pl.	ἐσμέν	“we are”
2 pl.	ἐστέ	“you (pl.) are”
3 pl.	εἰσὶ(ν)	“they are”

6. Personal pronouns ἐγώ and σύ

The 1st- and 2nd-person pronouns have full case forms. They are usually omitted (the verb already shows the person), and when used they are emphatic.

Examples:

- φιλεῖς με — “you love me.”
- εὐχαριστῶ σοι — “I give thanks to you.”

Paradigm — ἐγώ / ἡμεῖς, σύ

Case	1 sg.	1 pl.	2 sg.
Nom.	ἐγώ	ἡμεῖς	σύ
Acc.	ἐμέ / με	ἡμᾶς	σέ / σε
Gen.	ἐμοῦ / μου	ἡμῶν	σοῦ / σου
Dat.	ἐμοί / μοι	ἡμῖν	σοί / σοι

7. The impersonal οὐ δυνατόν ἐστιν + dat. + inf.

An impersonal expression: “it is (not) possible (for X) to do (Y).” The dative names the person; the infinitive names the action.

Examples:

- οὐ δυνατόν ἐστιν αὐτῷ αἶρην πάντας τοὺς λίθους — “it is not possible for him to lift all the stones.”
- οὐ δυνατόν ἐστιν εὐρίσκειν τὸν λύχνον — “it is not possible to find the lamp.”

8. Interrogatives: τί (“what?”) and ποῦ (“where?”)

τί is the interrogative pronoun “what?”; ποῦ is the interrogative adverb “where?” Both can also introduce indirect questions.

Examples:

- τί λέγεις; — direct: “what are you saying?”
- οὐ γινώσκει τί ποιεῖ; ποῦ ἐστιν τὸ ἀρνίον; — indirect & direct: “he doesn’t know what he is doing”; “where is the lamb?”

9. The adjective πᾶς, πᾶσα, πᾶν (“all, every”)

πᾶς in the singular often means “every” (each one); in the plural, “all.” Like μέγας, it has irregular forms.

Examples:

- πάντας τοὺς λίθους — masc. acc. pl.: “all the stones.”
- πᾶς ἄνθρωπος — masc. nom. sg.: “every person.”
